SWEET
BABY JESUS

The DiVine Paper

Version I

English . August 2021

SWEET BABYJESUS is a community driven token envisioned to inspire us to help each other irrespective of all our differences. SBJesus will make the world a better place as Jesus had dreamed.

Together, we restore the faith in humanity.

INTRODUCTION

Sweet Baby Jesus is a decentralized, ERC-20 high yield **reflecting** and the **real deflationary** token created for restoring the faith in humanity by introducing the concept of helping out all the holders who have faith in us.

Our vision is to create freedom from worldly burdens for the people in need. We aim to provide comfort, stability and peace of mind with the help of our community.

Our community will provide monetary support to the needy, starting from paying small grocery bills to sponsoring expensive surgeries for kids around the world.
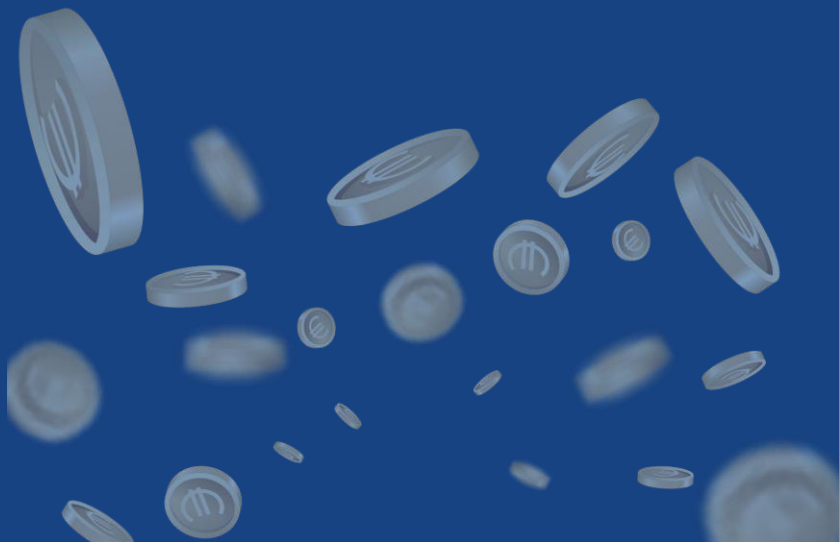

TOKENOMICS

Sweet Baby Jesus (SBJesus) is a decentralized reflecting deflationary token created on the Ethereum blockchain on 21 August 2021.

PASSIVE INCOME SYSTEM:

- 5% of every buy transaction and 3% of every sell transaction with Sweet Baby Jesus is redistributed to our pool of holders.
- By holding our tokens, you will see the number increasing automatically everyday as the community transacts.
- The team had made sure dead wallet will never receive any reflections and they will be distributed only to the real holders.

HYPER DEFLATIONARY CURRENCY:

- For every transaction - buys and sell, 2% of the transaction is taken out of circulation, meaning that our token supply is constantly shrinking and increasing the value of token with time.

SELF ADJUSTING SUPPLY:

- After every transaction, the maximum available supply of our tokens decrease, which in turn reduces the maximum buy limit after every transaction, which gives all investors a fair shot in securing their opportunities.

STEALTH LAUNCHED:

- "*For you know quite well that the day of the Lord's return will come unexpectedly*", we stealth launched fair and square. Everyone gets an equal opportunity at the same time together.

Name	SWEET BABY JESUS
Symbol	SBJESUS
Network	Ethereum
Initial Supply	500 Quadrillion

THE BURNS: EXPLAINED

In our contract, **we are not** following the traditional method of sending a majority of supply to the dead wallet initially before adding the liquidity, to enable the dead wallet to receive reflections from upcoming transactions by the buyers or sellers.

Our new burn (aka inside burns) makes sure that the coins are buried deep inside the contract forever and are in-accessible, reducing the available Maximum Supply. This way, the total available supply gets reduced real time and thereby increasing the worth of each SBJesus token out there.

We make sure the reflections are distributed between all our true holders and the dead wallet will never receive any reflections and we have also restricted the public from sending the tokens to the dead-wallet.

The total burned coins and total supply available can be viewed from the Etherscan contract.

ROADMAP

Stage I (0-500 Holders):

- Uniswap Stealth Launch
- Liquidity Lock
- Ownership Renouncement
- Branding
- Community Structuring
- Whitepaper Release
- Awareness Marketing
- Etherscan Info Update

We are here

Stage II (500-3000 Holders):

- Website Update
- Coingecko Listing
- 2500+ Telegram Members
- Accelerated Promotions
- CoinMarketCap Listing
- NFT Drops

Stage III (3000-10000 Holders):

- Grocery bill payments
- Listing on other popular exchanges
- Donations to charity organizations
- Partnerships with major influencers

Stage IV (>10000 Holders):

- Initiative to fund expensive surgeries for kids around the world.
- Organizing free Medical checkups worldwide with the help of the community.

HOW TO BUY SBJESUS

SBJesus tokens are currently available on Uniswap and can be purchased using our contract address:

`0x628dc3372a33e63db4dda5fa554566afcc056026`

You can follow the steps below if you are new to Uniswap.

1. **MetaMask**

   Register an ETH account on MetaMask or Coinbase.

2. **Uniswap**

   Go to to Uniswap and add our token contract address above.

3. **Connect a Wallet**

   Connect your MetaMask or Coinbase ETH wallet to Uniswap.

4. **Transfer ETH to your MetaMask**

   Buy ETH or transfer to your MetaMask or Coinbase Wallet

5. **Swap**

   Swap your ETH for your SBJesus tokens, hold it in your wallet and watch your value increase.

The live charts can be viewed on our [Dextools](#) page.
